Sir,

Please consider me as an applicant for a local contract for the following preferred fields: financial analysis, market study or project management. I also remain opened to any other position that can fit with my profile.

I just have been graduated last June 2010 from Asian Institute of Technology located in Rangsit where I got my MBA in Finance. My previous studies were about marketing and management in France and England.

Briefly, my three years experience concerned mainly the management of public projects for Madagascar government in a local consulting company. Later on I used to work for Madagascar Consulate in Bangkok in order to promote the country in Thailand.

I can speak English and French and actually I am attending Thai class for writing and speaking as I would like to set up my life here. Regarding my management personality, I like the work well-done in time. Communication has lot of significance to me and is a key factor of success as we all work in team and with stakeholders. However I know my limitations and will consider it into the job to make. Finally due to my living places, I have learnt how to work with different people adapting myself to situations and cultures.

My commitment to understanding and improving my personal skills is clear and remains a constant goal.

Please find attached my resume for more details.

I would welcome the opportunity to interview with your selection team and look forward to hearing from you in the near future. Thank you for your time and consideration.

Best regards,

Mikhoel Delevaux
